

ATTACHMENT 2

ENGINEERING REPORT

Valley Public Television, Inc.
Bakersfield, California

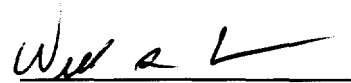

DECLARATION

I, William A. Hamman, do hereby declare under penalty of perjury that the following is true and correct to the best of my knowledge and belief:

1. I am employed as a project engineer by the firm of Moffet, Larson and Johnson, Inc. (MLJ), consulting telecommunications engineers. MLJ has been retained by Valley Public Television, Inc. (Valley) to assist Valley in connection with its application for a new noncommercial television station at Bakersfield, California. The engineering exhibit for Valley's amendment to move to a new transmitter site to eliminate the short-spacing of its currently proposed transmitter site to vacant allotment for Channel *25 at Ridgecrest, California, was prepared by me or under my direct supervision. That amendment reflects that from the site to which Valley seeks to move, its proposed operation would place a predicted Grade B over an area of 9,350 square kilometers, encompassing a population of 450,205 persons (using the 1990 U.S. Census figures).

2. MLJ did not prepare the engineering exhibit for Valley's original application for Bakersfield. However, I have employed Valley's predicted Grade B contour coverage, using 1990 census figures, from the site that is reflected in Valley's pending application (BPET-900904KE). The population figure given in that application for Valley's Grade B contour is 421,000 persons. It is my understanding that the calculation in the original application was done using figures for the 1980 U.S. Census, since the 1990 census figures were not then available. When the 1990 U.S. Census figures are used, the predicted Grade B contour of Valley's current proposal encompasses 453,127 persons.

3. I used the same method of calculation for the population within Valley's predicted Grade B contour in its pending application as I did for the population within Valley's proposed predicted Grade B contour in the exhibit to the amendment to relocate the transmitter site. The 1990 population in both instances was calculated using a computerized algorithm which sums the population of all the Block Groups whose population centroid is contained within the area of concern. The population data source is the U.S. Department of Commerce, Bureau of the Census, Census of Population and Housing 1990, Public Law 94-171.

William A. Hamman

Signed this 12th day of May, 1993.
